

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

General pace of lectures.

Always tries to get an answer out of the class.

Constantly checks to see if we understand the topic

2. Which aspects could be improved?

Either re-explaining the topic or moving on when no one has the intention of answering.

3. Other comments?

I love Graham ♥

 my burning love.

From Dad.

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

I liked the presentation of the module. Everything was well explained and good examples given.

2. Which aspects could be improved?

The module was great just myself coming from a different College, I was not as well prepared as could have been.

3. Other comments?

None really

Just happy with the module

Student Evaluation: MA135/MA166-2 Calculus

1. Which aspects of the module did you like?

the tutorials are really helpful. and the exercise sheets help throughout the year and for the final exam.

2. Which aspects could be improved?

More explanation needed when solving the problems → like why you did each step.

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

Integration

2. Which aspects could be improved?

Differential equation

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

- learning about the different parts of maths.
- I like the differentiation part of the module

2. Which aspects could be improved?

- Get rid of the none of the above option in the homework sheets.

3. Other comments?

Techniques of integration are very hard to learn.

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

Found homework sheets linked well with the work we did in class therefore they were very manageable.

2. Which aspects could be improved?

Solutions to past exam papers.

3. Other comments?

Student Evaluation: MA135/MA166-2 Calculus

1. Which aspects of the module did you like?

Differentiation was well explained.

2. Which aspects could be improved?

All notes could be easier accessed & Homework sheet on blackboard.

3. Other comments?

Techniques for integration are very hard to learn.

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

- Differentiation.

2. Which aspects could be improved?

- Get rid of the none of the above option on homework sheets

3. Other comments?

Student Evaluation: MA135/MA166-2 Calculus

1. Which aspects of the module did you like?

I enjoyed the differentiation part of the module and learning the different methods of integration which I didn't know about before.

2. Which aspects could be improved?

The none of the above answers in the homework sheet

3. Other comments?

Techniques of integration are difficult to learn and any other tips would be helpful.

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

Revision / doing past exam paper questions.

2. Which aspects could be improved?

Reduce emphasis on integration

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

Asked the class questions rather than give a straight up solutions

2. Which aspects could be improved?

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

The whole module in general was good

2. Which aspects could be improved?

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

Everything is good

2. Which aspects could be improved?

nothing.

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

- The homework sheets
- Doing examples (written) in class

2. Which aspects could be improved?

- The content sometimes felt like it didn't match the homework sheets.

3. Other comments?

Both Graham and Kevin are excellent lecturers :).

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

- fun class
- lecturer tries to make class interactive
- lecturer asks questions to the class
- online hw is similar to problems done in class.
- lecturer is funny, makes jokes. Motivates me to go to class.
- making integration easy to learn!
- lecturer doesn't just do the questions, he asks the class to answer them.

2. Which aspects could be improved?

- ~~not~~ taking long to answer one problem.

3. Other comments?

lecturer tries his best to make integration easy to learn & tries to ~~make~~ communicate well with the class to answer problems.

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

- I found the examples which were done in the lectures very helpful, and they helped me with my study.
- The lecturer is very nice and makes me interested in the topics
- The lecturer always leaves time for us to ask questions.

2. Which aspects could be improved?

- If solutions of the homework were available after each online homework sheet was completed.

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

The lecturer really easy to approach and has a good attitude

Took time to listen and explain questions.

2. Which aspects could be improved?

Techniques of integration are difficult to follow,

And go over already done homework as a lot of the homework questions were hard to relate to what we did in class.

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

Classes were two days in a row and not split up.

2. Which aspects could be improved?

Confused about differential equations
- More time on this.

3. Other comments?

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

I found that I was better able to follow the first topic on integration at the start of the semester

2. Which aspects could be improved?

The part of the module I found most difficult was the techniques of integration.

3. Other comments?

Student Evaluation: MA135/MA166-2 Calculus

1. Which aspects of the module did you like?

2. Which aspects could be improved?

Clearer step-by-step examples when introducing topics.

3. Other comments?

no.

Student Evaluation: MA135/MA160-2 Calculus

1. Which aspects of the module did you like?

2. Which aspects could be improved?

3. Other comments?

Didn't tell us ^{when to use each} ~~which~~ technique of integration
