

MA286 Evaluation Form

1) What aspects of the module did you like?

Interesting lecturer, good notes.

2) What aspects of the module could be improved?

more examples.

3) Any other comments?

Good overall.

MA286 Evaluation form

1) What aspects of the module did you like?

I liked the lectures, the module content, and the enthusiasm of the lecturer.

2) What aspects of the module could be improved?

No comments.

3) Any other comments?

No comments.

MA286 Evaluation Form

1) What aspects of the module did you like?

I liked the fact you wrote your notes in class

I feel this gave your lectures a good pace.

2) What aspects of the module could be improved?

Blackboard / online notes

3) Any other comments?

THANK YOU

MA286 Evaluation form

1) What aspects of the module did you like?

The way you explained everything in detail and gave plenty of examples. Also your enthusiasm about the subject.

2) What aspects of the module could be improved?

Not a thing.

3) Any other comments?

No

MA286 Evaluation form

1) What aspects of the module did you like?

Graham made the lectures very enjoyable and moved at a pace that seemed to suit the class. He ~~used~~ gave great real life examples and hope he teaches maths next year

2) What aspects of the module could be improved?

none

3) Any other comments?

none

MA286 Evaluation form

- 1) what aspects of the module did you like?
Applying the Maths to practical scenarios was interesting.
- 2) what aspects of the module could be improved?
More Examples.
- 3) Any other comments?
I like your accent
I can use a screwdriver

MA286 Evaluation form

1) What aspects of the module did you like?

I like that he took a different approach to how my maths methods teacher taught it because even though they were covering similar concepts, I got to learn 2 methods and it gave me an alternate view. Also I liked how he did the maths in front of us rather than reading off slides.

2) What aspects of the module could be improved?

Nothing, it was a fab course.

3) Any other comments?

~~Also~~ I liked your energy and accent.

MA286 Evaluation form

1) What aspects of the module did you like?

- The geometrical explanations and how they relate to higher dimensions
- More fundamental approach to learning integration
- Made ~~the~~ line integrals more intuitive as well as div, grad, curl

2) What aspects of the module could be improved?

- Better prepared tutorials

3) Any other comments?

- I really enjoyed it

MA286 Evaluation form

1) What aspects of the module did you like?

Applying the maths to practical scenarios was interesting.

Overall I found the course stimulating and enjoyable

2) What aspects of the module could be improved?

Not much

3) Any other comments?

Lectures were interesting, never fell asleep!

MA286 Evaluation form

1) What aspects of the module did you like?

Your humour and diligence in explaining things.
And of course, your wonderful accent.

The lack of immense weekly pressure that's to be found in the school of Physics.

The assessment style suits my introverted thinking as it's low pressure.

2) What aspects of the module could be improved?

Not a lot really. You're a pretty rad bro.

3) Any other comments?

Keep the swastika joke, it's stellar!

That Right Hand Rule Malarkey was also pretty hilarious.

In other words, you're nailing it, keep it up!

MA286 Evaluation form

1) What aspects of the module did you like?

The teaching style used. I appreciated being caught the meaning behind things as opposed to how to answer questions. Lecturer was clear and interesting throughout. The fundamental approach to integration was very helpful. The tests for continuous assessment were a great encouragement to practice and study.

2) What aspects of the module could be improved?

Not a lot comes to mind. The tutorials weren't as productive and helpful as they could have been. Otherwise it was awesome!

3) Any other comments?

This was my favourite module of the semester. The lecturer was fantastic.

MA286 Evaluation Form

1) What aspects of the module did you like?

The content of this course was described well and the connections were made and explained for where what we did in lectures can be applied in the real world which helped me understand the material.

2) What aspects of the module could be improved?

-

3) Any other comments?

-

MA286 Evaluation form

1) What aspects of the module did you like?

- I like the way the course outline is clearly stated online with ~~the~~ notes easily accessible.
- Graham's lectures

2) What aspects of the module could be improved?

- Solutions to homework problems

3) Any other comments?

MA286 Evaluation Form

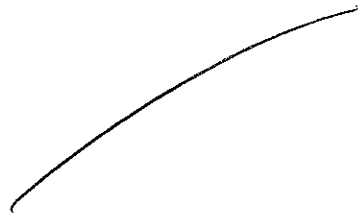

1) What aspects of the module did you like?

Very good lecturer

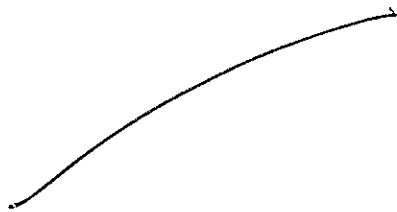

Really good notes in lectures

Class tests are very helpful instead of having assignments
- learn everything for the tests rather than only half understanding everything on assignments

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Electromagnetism

2) What aspects of the module could be improved?

Tutorials

3) Any other comments?

MA286 Evaluation form

1) what aspects of the module did you like?

the lecturer's enthusiasm

2) what aspects of the module could be improved?

seemed repetitive

Tutorials

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Most of it

2) What aspects of the module could be improved?

2-forms using algebra (A, B, C etc)

Wedges, curl, divergence

3) Any other comments?

~~None~~

Have lectures on late
in the day

MA286 Evaluation form

MA286 Evaluation form

1) What aspects of the module did you like?

- Great at explaining
- Lectures were very helpful
- All topics were easy to understand.

2) What aspects of the module could be improved?

Tutorial lectures need improvement & more examples in problem sheets

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Lectures had lots of examples, and things were explained well.

2) What aspects of the module could be improved?

3) Any other comments?

Exam structure was well layed out, and the exam structure makes sense.

MA286 Evaluation form

1) What aspects of the module did you like?

That we mainly completed actual examples and that every aspect of the course was explained in simpler terms if you did not fully understand anything.

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

I enjoyed how this module was taught by you writing the slides as you went instead of using a power point, it made the work easier to follow.

2) What aspects of the module could be improved?

The tutorials aren't of much benefit. If the tutor could prepare answers before the tutorial it would probably run a lot smoother.

3) Any other comments?

No.

MA286 Evaluation form

1) What aspects of the module did you like?

The course ~~structure~~ has a clear goal of what we need to learn

2) What aspects of the module could be improved?

Solutions to homework

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?
Lecturer, subject.

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

- Easy access to lecture notes online.
- Graham's sense of humour.
- Coherent notes
- Easily studied in conjunction with Schaum book.

2) What aspects of the module could be improved?

- Poor tutor.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

The problem sheet / Homework sheet tying into the class exams.

The Welsh accent of our lecturer.

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation Form

1) what aspects of the module did you like?

Application of calculus to solving more tangible surfaces and objects.

2) what aspects of the module could be improved?

Tutorials having more structure.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

- The course wasn't overly structured, which now it flowed.

2) What aspects of the module could be improved?

- Didn't feel the tutorials were very helpful.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Lectures are interesting and interactive. Lecturer gives energy and life to lectures.

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

I liked the way all continuous assessment was based on the homework sheet. This kept everything simple, and made everyone learn a lot from it.

The assessment helps for final exam also.

2) What aspects of the module could be improved?

~~Possibly some of the lecture notes could be better structured.~~

3) Any other comments? -

MA286 Evaluation form

1) What aspects of the module did you like?

- Lecture notes + explanation of concepts was good
- Continuous assessment was good - class tests + no assignments.

2) What aspects of the module could be improved?

- Some ~~example~~ ~~given~~ question on the problem sheet were different to examples in class (weren't explained) and weren't in the book so were hard to do.

ST

- Structure of course - didn't ~~seem~~ seem very structured
- • Notation hard to understand at time (1-forms...)

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

- gave good examples
- good presentation of work.

2) What aspects of the module could be improved?

- better ~~explain~~ explanation
- found language difficult to understand.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

I liked the different approach it was a bit ~~bit~~ confusing due to it not using the same wording as calculus that I am use to.

2) What aspects of the module could be improved?

At the beginning it was confusing using 0-forms and 1-forms etc. I found that it was difficult to relate it to the calculus where those words aren't ~~was~~ used

3) Any other comments?

Great lecturer and good interaction, never fell asleep

MA286 Evaluation form

1) What aspects of the module did you like?

All of it.

2) What aspects of the module could be improved?

3) Any other comments?

You're a good lecturer. Good notes, available on-line.
The problem sheets are very helpful.

MA286 Evaluation form

1) What aspects of the module did you like?

You were a great lecturer, which really helps.

2) What aspects of the module could be improved?

More examples always help, but I think you did as many as were necessary really.

3) Any other comments?

Have a nice Christmas!

MA286 Evaluation Form

1) What aspects of the module did you like?

The extended and 'drawn out' explanations really helped ~~to~~^{with} understanding the subtleties of the course content.

2) What aspects of the module could be improved?

The tutorials could be improved.

3) Any other comments?

MA286 Evaluation Form

1) What aspects of the module did you like?

Well described concepts & the lectures are straight forward. Good lectures.

2) What aspects of the module could be improved?

Nothing really. The handwriting was hard to understand.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

the interrelation
of all aspects of the
course

2) What aspects of the module could be improved?

tell ~~us~~ us what
differential means.

3) Any other comments?

Vary notation

Excellent lecturer
hope to have you
again

MA286 Evaluation form

1) What aspects of the module did you like?

Good Use of examples & Good definitions

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

How aspects of the course were related to real world applications by the lecturer.

2) What aspects of the module could be improved?

- I would prefer if the continuous assessment had some online assignments rather than all in-class tests

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Clear Lecture Notes, well paced,
warm lecturer!

2) What aspects of the module could be improved?

More exam question examples, maybe more
problem sheets

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Seeing ~~difficult~~ calculus at higher dimensions

2) What aspects of the module could be improved?

More tutorials during the week

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

That the lecturer gave Real examples of what each section can be used for making it less abstract and easier to understand.

The lecturer interacted with the class making it more interesting and enjoyable

2) What aspects of the module could be improved?

Nothing.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

I liked the depth of the course. Much more than just an analysis course. Very informative about theory involved in calculus.

2) What aspects of the module could be improved?

More working examples.

3) Any other comments?

Will I ever use it again BSC Financial Maths?

MA286 Evaluation form

1) what aspects of the module did you like?

The subject itself

2) what aspects of the module could be improved?

None

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

Good use of examples

2) What aspects of the module could be improved?

Slow down ~~a~~ ~~to~~ pace a little

3) Any other comments?

No

MA286 Evaluation form

1) What aspects of the module did you like?

The lectures were interesting and continuous assessment was helpful.

2) What aspects of the module could be improved?

The tutorials. The tutor was disorganised, hard to hear and couldn't or didn't explain what he was doing on the board.

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

interesting, interactive, could ask questions/approach lecturer with problems

2) What aspects of the module could be improved?

3) Any other comments?

MA286 Evaluation form

1) What aspects of the module did you like?

It was very understandable, it was presented well, and very well thought

2) What aspects of the module could be improved?

organisation of Tutorials

3) Any other comments?
