

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I liked the language used for the mathematics involved.

I really liked the lecturer

2) Which aspects could be improved

Test spacing? ?!

3) Other comments

Very fun. module which worked well in conjunction with other Calculus courses

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I liked the way this module linked in ~~sets~~ with the maths in my other modules such as Physics.

2) Which aspects could be improved

Tutorials were helpful but didn't finish what we needed for last test.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Everything is based off the problem sheets and tutorials
so easy to keep up with the topics leading up to tests

2) Which aspects could be improved

Less theory

3) Other comments

Are you ^(jealous) Gr Ellis :)

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

I liked how the language of differential forms can be applied to physics

2) Which aspects could be improved

More applications, ~~it~~ it seems very theoretical and is hard to understand.

3) Other comments

I would prefer weekly/fortnightly homeworks rather than class tests.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- The clarity of lectures
- Tutorials were very helpful
- There were a good amount of examples
- Good lectures and tutor

2) Which aspects could be improved

- The speed of the lectures were a bit slow

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

lectures were interesting and informative. kept it interesting and fair. Liked the fact that 30% was done before exam.

2) Which aspects could be improved

more full exam questions, not just half examples.

Maybe online homework sheets to build up more marks before exam.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Tutorials & inclass tests.

2) Which aspects could be improved

Homework Q's checked.

3) Other comments

—

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Difficult aspects of integration were explained well

2) Which aspects could be improved

Material could be covered quicker

3) Other comments

Graham is bae ♡

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Tutorials are a great help
explain at a good pace

2) Which aspects could be improved

More examples in class, like exam style
questions. Post answers for the problem sheets
for easier revision.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- I enjoyed this module, as ~~there~~ there was ways to understand challenging concepts.
- I liked the way applications were used to explain the concepts.
- How the class tests helped you really revise the key concepts of the course.

2) Which aspects could be improved

3) Other comments

Overall really enjoyable module.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

It was just interesting, there was never a section that left me bored.

2) Which aspects could be improved

I would rather assignments to tests.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

• lecturer made the maths more interesting

2) Which aspects could be improved

Tutorials on at better times

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

The class tests were effective in motivating me to study.

The tutorials were also very helpful.

2) Which aspects could be improved

The language is very hard to wrap your head around. More practical application examples throughout the lectures/homework questions might have helped.

3) Other comments

Have a nice christmas!

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

All

2) Which aspects could be improved

~~Hard Could you please write more~~
Could ~~you~~ please write more clearly.?

3) Other comments

No.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

The link to real world applications.

2) Which aspects could be improved

The timing of the in class tests. Let's too late.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

The Lecture notes are represented well and the lectures are very interesting.

The lecturer is very enthusiastic about the module

2) Which aspects could be improved

Timing of class Tests

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- The lectures
- Concepts were well explained

2) Which aspects could be improved

- Lecture notes being made available before class for pre-reading.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I felt this module built well on previously learned material. I thought it was just the right level of challenge.

2) Which aspects could be improved

I would like for there to be homework assignments counting towards our grade, as the fact that our grade depends entirely on exams can be quite nerve-wracking.

3) Other comments

Bring back the blackboards, am I right? ;)

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

I enjoyed the actual content of the module and the way in which it was taught. I find Graham's way of teaching to be very effective and stimulating. I enjoy how he does our lecture notes in the lecture and then puts them online ~~not~~ as opposed to the usual mountain of slides given in these modules.

2) Which aspects could be improved

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- The questions relating to the second test.
- Tutorials were very helpful
- The continuous assessment helped to keep on top of work.

2) Which aspects could be improved

- More examples rather than explanations

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

2) Which aspects could be improved

More examples of questions and how to apply what we've learnt

3) Other comments

Tutorials were helpful.

Student Evaluation Form

Module: MA2286 Differential Forms

1) which aspects of the module did you like?

The tutorials were helpful.

Tutor explained Questions well

2) which aspects could be improved

Lectures are a bit airy fairy

More examples please.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

the tutorials

Tutor explains it well

2) Which aspects could be improved

the lectures are extremely boring and tedious
~~Need to be in~~ Its not grahams fault, he tries
Its just reading straight off the notes with
few examples, theres no point coming to the
lectures.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Tutor was very good.

The 1 forms

2) Which aspects could be improved

More examples

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

• THE LECTURER IS GREAT.

• TUTORIALS WERE HELPFUL.

2) Which aspects could be improved

Less of the theory &

more questions & APPLICATIONS.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- Notes were well presented on ~~blackboard~~ your webpage
- Interesting topic.
- Well thought
- Lectures were good.

2) Which aspects could be improved

- Not a lot, maybe have tests on Wednesday instead of Monday (wasn't that big of a problem though).
- tutorial times??

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) which aspects of the module did you like?

2) which aspects could be improved

Relevance of lectures and lecture notes to exam papers.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

• Taught well, material covered well, interesting.

• ~~Other~~ Tutorial Worksheet helped a lot with exams.

2) Which aspects could be improved

More examples, in class

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- * It was well presented.
- * lecturer was enthusiastic and tried to make it interesting & tried to link it to examples
- * Notes were well presented.
- * The class Tests really helped with exam preparation.

2) Which aspects could be improved

- * Just explain the relevance more of the module to us in Financial Math.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I liked the differentiation as it helped me with one of my other modules.

2) Which aspects could be improved

I would have preferred if we had online tests as opposed to inclass tests.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

d. Everything ~~to~~ except vector fields

2) Which aspects could be improved

Vector fields seemed quite rushed

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Liked that it gave a basis for language that may have been harder to pick up at a later date. Helped my understanding of some other modules too.

2) Which aspects could be improved

Were some ~~gap~~ gaps in lectures due to lecturer being absent so felt slightly rushed towards end

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

2) Which aspects could be improved

Online homework instead of tests.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

Evaluating areas on a graph by integrating forms
Applications of differential forms.

2) Which aspects could be improved

More examples for approaching different questions

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Very clear layout, questions for class tests
& exams laid out at the start.

Good explanations for different topics

2) Which aspects could be improved

Tutorials could start earlier as there
is a delay into tutorials in relation
to material for class tests

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

The material was extremely interesting, and taught in an ~~enjoy~~ enthusiastic manner

2) Which aspects could be improved

I would prefer ~~more~~ assignments throughout the semester to class tests.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

interesting topic

lectures clear + well delivered

2) Which aspects could be improved

more exam type examples

3) Other comments

—

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- The real-life examples for differential forms.
- Tutorials very helpful
- Lecturer takes time to explain
- Good amount given for C.A

2) Which aspects could be improved

- Better times for tutorials

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

- Nice lecture notes online.
- Good structure, i.e. 3 equally weighted tests
- High % for CA (30%)

2) Which aspects could be improved

Have worked solutions to the homework sheet @ end of module to help studying for test

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

- The maths was interesting to work out and solve

2) Which aspects could be improved

- The language used

- The explanation of the maths

- Better examples that are similar ~~to~~ to the questions

- No exam on the last day
on the exam

3) Other comments

• Name a ~~team~~ ^{Building} after Graham Ellis

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I liked it all

2) Which aspects could be improved

We should be given more time
or less material.

Hard to keep up.

3) Other comments

If there were more lectures in
a semester, the lecturer would have
more time to explain things.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Integration

Differentiation

2) Which aspects could be improved

More examples

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

This is my second year with Graham now, and have to say he's done a great job getting some difficult concepts across. Graham has a good style of teaching which encourages us to think about what is happening.

2) Which aspects could be improved

Maybe a few more worked examples but overall I thought it ^{was} good.

3) Other comments

Hopefully I have the pleasure of him teaching me again in the future.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Notes explained clearly

2) Which aspects could be improved

Nothing really

3) Other comments

None

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I like everything

2) Which aspects could be improved

~~notes~~

put notes on blackboard.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

- I like the way the exact notes from lectures are available on line.
- I find it interesting in how it can be applicable to the real world.

2) Which aspects could be improved

~~There are~~

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I like the way you can use
these topics in the real world

2) Which aspects could be improved

notes on Blackboard. preferably.

3) Other comments

~~others~~

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

Adib is a really good tutor.

2) Which aspects could be improved

online homework instead of in-class tests.

only some of the homework questions have been done in the tutorials.

3) Other comments

nobody is SUMS can help with MA2286.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

How easy the content was to visualise

2) Which aspects could be improved

online assignments instead of in class test.

3) Other comments

The speed makes new concepts easier to learn.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

the lectures

Material is relevant to everyday life.

2) Which aspects could be improved

times of class tests.

explaining harder material and doing harder examples.

3) Other comments

mu

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

No assignments

2) Which aspects could be improved

Make it easier.

Starts things and comes back to them 2/3 lectures later. Hard to keep up.

~~Repetitive~~

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

- Friendly lecturer
- No assignments.

2) Which aspects could be improved

- Lecturer went very slow.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

the lectures

2) Which aspects could be improved

tutorial times

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- Oriented intervals
- New approach to calculus
- Use of \wedge is easier ~~to use~~ than other modules where wedge is not used
- The lecturer

2) Which aspects could be improved

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

continuous tests were useful.

2) Which aspects could be improved

Put Notes on blackboard

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- Problem sheets were useful.

2) Which aspects could be improved

- Explain why this course is useful.
- Spread out the class tests better.

3) Other comments

- You really like wedges.

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

Lectures were well presented and notes were well organized.
Strong correlation between the problem sheet and what was done
in class

2) Which aspects could be improved

—

3) Other comments

Thanks for an enjoyable 12 weeks Graham!

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- The tutorials explained aspects of lecture's that were ~~thorough~~ difficult.
- The pace of lecture's was good.

2) Which aspects could be improved

- The 3rd in class exam, should be before week 12.
- Do more difficult examples in class.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

The lecturer explaining everything he's doing in a clear, logical way

2) Which aspects could be improved

It'd be easier if the course content and announcements were made on Blackboard. The tests should have been more spread out, not left until the last few weeks.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

The continuous assessment was good for keeping on top of the topics, I enjoyed the lectures as they were engaging and interesting

2) Which aspects could be improved

More applications and ^{show} more ways ~~at~~ we can use it. As financial maths student it's hard to see where we'll use ~~the~~ the material

3) Other comments

Enjoyable course and interesting lectures

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

New mathematical approach.

Humour of lecturer.

Relaxed approach to mathematical rigour.

2) Which aspects could be improved

1. The 3 tests should be much earlier, so the course is truly ~~fully~~^{continuously} assessed, as Semester 1 is a/unlike Semester 2) a short immediately followed by exams.

2. A certain lack of clarity of what is essential, and how everything flows from it.

3) Other comments

Tutorials to be (at some late point) put on line.

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

- Homework sheet
- Lecturer
- Slides - easy to understand
- Tutor very good

2) Which aspects could be improved

- Last class test too close to Exams
- I'm a financial Maths student and Grahame failed to convince me that this was a ~~very~~ worthwhile Module. ~~Also~~ Not one question on the course had a financial edge to it. ~~Very few~~ In comparison, physics gets mentioned dozens of times

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

The lecture notes were concise, contained the relevant formulae and worked examples that made the material easy to understand.

The online homework (and the accompanying references to the textbook) makes for an excellent study sheet, especially since we are given a reference to compare our method to.

2) Which aspects could be improved

~~Some of the topics were poorly labelled (rather just 'subject 14, Stokes equations'), leaving me~~

I cannot think of any faulty aspects of the module

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

2) Which aspects could be improved

Lots of theory, hard to answer homework / exercise questions with the notes being the majority theory.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

I enjoyed the material that was taught as it was supported by plenty of examples in the lectures. Many of the concepts relate to "physical" examples such as volumes, areas etc. which helps give substance to the material. Continuous assessment was good and encouraged going to the tutorials which were also very well done.
Well taught overall

2) Which aspects could be improved

The lectures could be monotonous sometimes because of just using the overhead. No powerpoints or other materials, which could have made it more engaging.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential forms

1) Which aspects of the module did you like?

2) Which aspects could be improved

I don't think all of the continuous assessments should be in-class tests. I think some marks should go for homeworks.

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

- Examples
- Problem sheet
- In-Class Tests continuous Assessment
- Content

2) Which aspects could be improved

3) Other comments

Student Evaluation Form

Module: MA2286 Differential Forms

1) Which aspects of the module did you like?

- the content was useful & relevant.

2) Which aspects could be improved

Not repeating material on. CA tests.

3) Other comments

The module was heavily tutorial dependant.
Tutorial times should be expanded
to reflect this.
